DETAILED ACTION

1. Claims 1-30 are allowed.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record discloses communicating encrypted data in SSL link which are in layers above packet layer and the encrypted data is later decrypted in layers above the packet layer while the secondary reference discloses encrypting and decrypting data at packet layers. However, the prior art of record individually or in combination does not explicitly disclose receiving encrypted application data from the client via the secure communications session, wherein the encrypted application data was encrypted by the client device by encrypting application data at a session layer above a packet level of a network stack of the client; and decrypt the encrypted application data and forwarding the decrypted application data to the server via the secure network without processing the application data with an application layer of the network stack of the intermediate device in light of other features disclosed in independent claims 1, 12, 23, and 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
